MODAL VERBS

This value **must be** an integer, not a string.

The server is slow, so the **problem might be** in the network.

There is a bug here; the result **can't be** negative.

CERTAINTY

If you don't save the file, you **are bound to** lose your code.

This software update **is guaranteed** to fix the crash.

Python **is undoubtedly** the most popular language for beginners.

Bad code architecture **will inevitably** cause problems in the future.

It's a given that every programmer makes mistakes.

PROBABILITY/ POSSIBILITY

If we optimize this function, the app **may well** run much faster.

I **would guess** that the database connection is broken.

In all probability, the project will be finished by Friday.

There's a strong likelihood that AI will help us write code faster.

It is highly likely that our users will prefer the new interface.

There's a chance that this library is outdated.

The odds are that you will find the answer on Stack Overflow.

IMPROBABILITY

It seems totally unimaginable that people used to program without the internet.

It's highly unlikely that this simple script will break the server.

NECESSITY

It is **crucial** that we test our code before release.

New customer requests **will need to be discussed** at the evening meeting.

OBLIGATION

New developers **are expected** to learn Git in their first week.

It's obviously the developer's **responsibility** to fix their own bugs.

This function **is supposed** to return true, but it returns false.

A requirement is that the app must work on mobile phones.

ABILITY

This framework is capable of handling millions of requests.

She **has an aptitude** for solving complex algorithmic puzzles.
